

Bloodborne Pathogens Training

Preventing Disease Transmission

The OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030) lists safeguards an employer **must** take to protect employees from the health hazards of Bloodborne Pathogens. Any employee for whom there is a “reasonable anticipation” that they may come in contact with blood or other potentially infectious materials on the job, is covered by this standard. This would include *First Aid Providers*.

Sensible Safety’s’ OSHA compliant, comprehensive 2 hour training course covers;

- The OSHA Bloodborne Pathogens Standard
- How Infections Occur
- Bloodborne Diseases
- How Infections Are Spread
- Personal Hygiene
- How To Protect Yourself From Infection
- Engineering and Work Practice Controls
- The Hepatitis B Vaccine
- Employer’s Exposure Control Plan *and so much more....*

Contact Sensible Safety, Inc. today to schedule this OSHA required training.
